Cardinal Wyszynski	Crimson-Red	Free flowering Polish introduction wit 6-8" large crimson flowers, very vigorous	2	July-September
Charmaine	Red	Rich red double, semi double and single flowers, grows to a height of 6-7 feet	2	May-June, September
Diamantina	Blue-Purple	4-6" pom-pom like blue-purple double flowers, each flower last up to 4 weeks	2	June-August
Empress - <b>NEW!</b>	Purple	Very hardy dark lavender with tints of red, 8-9" flowers	2	June & September
Hagley Hybrid	Pink	Medium-size rich pink 5-6" flowers with ruffly edges, attractive seed heads	3	June & September
Jackmanii Superba	Purple	Rich, velvet purple 5" open flowers	3	July-September
John Paul II - <b>NEW!</b>	Light Pink	Light pink 5-6" flowers, very vigorous grower and very showy	2	May, June, September
Josephine	Pink	Flowers are almost bronze, inner petals are lilac with pink bar, pom-pom look	2	June-August
Marie Boisselot	White	Very large pure white flower with yellow anthers	2	June-July, September
Mrs. N. Thompson	Blue & Scarlet	Flowers that are deep blue with scarlet bar	2	May-June, September
Mrs. Robert Brydon	Blue-White	Heracleifolia, clustered bluish-white 1" flowers, vigorous, hardy and free flowering	3	July-September
Multi Blue - <b>NEW!</b>	Dark Blue	Double dark blue to purple 4-5" flowers, one of the best double flowering Clematis	2	May-June, September
Nelly Moser	Pale Pink & Red	Pale pink with red bar down middle of each petal, will grow in the semi-shade	2	June & September
Niobe	Magenta-Red	Very dark magenta-red pointed petals with gold anthers, a true red	2	June-September
Nubia - <b>NEW!</b>	Red	Very free flowering clematis with stunning 5" dark red flowers, grows to 3-5'	3	June-August, September
Picardy	Red-Purple	Free flowering, pretty 4" red/purple flowers that have reddish brown anthers, 4'	2	June-August
Piilu	Two Toned Pink	Early double pink blooms then single blooms in later bloom period	2	May-July, September
Rebecca	Red	Very large flowers that are stunningly bright red and yellow anthers, free-flowering	2	May-June, August
Sapphire Indigo	Purple	3' wide mound bush Clematis, 4" dark purple flowers, indigo anthers, shade	2	June-September
Snow Queen	White	Meandering over fences, trellises or through shrubbery, Clematis supplies vertical interes	2	May-June, August
Sweet Autumn (Paniculata)	White	Vigorous grower, clusters of small, very fragrant, white flowers	3	August-September
Sweet Summer Love	Red & Violet Tones	Sweet fragrance, star-like, multi-colored blooms	3	July-September
Texensis Etoile Rose	Pink	Semi-nodding flowers are 2" in size, scarlet-pink with yellow anthers	3	July-September
Texensis Princess Diana	Pink	Miniature tulip-like flowers are 2" long, pink outside with a deep pink central bar	3	June-July, September
The Countess of Wessex - <b>NEW!</b>	White & Blush	Free flowering compact clematis, grows well in a partial shady area	3	May-June & August-September
Viticella Betty Corning	Light Blue	A charming nodding flower with four petals of light blue	3	July-September
Viticella Purpurea Plena Elegans	Rose-Purple	Extremely showy double rose-purple flowers	3	July-September
Viticella Venosa Violaacea	White & Purple	4-5" flowers of white with purple veins, purple edges, will grow in semi-shade	3	July-September
Warsaw Nike	Purple-Red	Reddish purple 5" flowers	2	May-September

### **Clematis Culture**

The best time to plant clematis is Spring, Summer or early Fall in a location of 5-6 hours of sunlight.

Clematis roots are long and run deep and like it cool and damp, but not soggy. A good idea is to plant annuals around the base of the clematis, plant a low growing shrub to shade the roots, or mulch the ground around the base of the clematis plant to help keep the soil and roots cool. Loosen the soil to a depth of 2 feet. Mix this soil with peat and sand. Carefully set your clematis plant in the hole so the crown is 1 inch below the soil level when the plant was in the pot.

Stake the plant and if possible wrap a piece of screen loosely around this to prevent animals from breaking or eating off the stem for the first year. The stake should be placed towards the trellis to train the plant to its permanent support.

Keep your clematis well watered, do not let it dry out. In years to come always soak once a week in dry weather. Feed twice a year with a balanced granular fertilizer, or a good water soluble fertilizer.

Prune your clematis the first Spring after planting, back to 10-12". This is very important to get your plant off to low branching and heavier flowering over the whole clematis vine.

Apply a mulch around the base of your clematis through the winter dormant months. With proper care your clematis plant will give you much enjoyment for many years!

### **Pruning Techniques**

1. This group of clematis produce their flowers directly from old stems and, therefore, pruning must not be done until right after all flowering has been completed. Prune this group by removing all dead and weak stems immediately after flowering. Large established plants over 15 feet are normally not pruned, especially if they are growing in trees. All stems at this time should be tied into position on their trellis or other host. Also, if the Clematis has outgrown their space the correct and only time to prune to size is right after flowering is done. After pruning new growth will begin, this being the stems for next year's flowers.
2. In this group all first flowering comes from last season's ripened stems. In early Spring watch for swelling leaf buds beginning to show. Cut all dead material off above these swelling buds. Be sure all growth is tied to trellis at this time. Do not tie too tightly, so growth can begin and not hampered by tying too tight or cracking these stems
3. This group blooms later and from new growth. This group should be pruned in February or March as new leaf buds begin to show low on the plant. All dead material above these buds should be removed at this time. Clean out any old foliage or foliage with mildew at this time also.
